## Overview

The aim of the joint event is twofold. The AIRO PhD School 2021 provides a stimulating learning environment where participants get opportunities to develop research skills, increase their knowledge base, collaborate with others in their own and complementary research areas, engage in debate, have access to experts in the field. The 5th AIROYoung Workshop promotes the sharing of knowledge about advanced methodologies and applications through the interactions between OR and other research communities from various sectors (applied mathematics, computer science, engineering, economics, etc.).

The general topic of the event is “*Optimization and Data Science: Trends and Applications*”. The details about the schedule of the lecturers are reported below and can be found at the following website: <http://opslab.dieti.unina.it/index.php/en/>

**To participate at the event it is necessary to register at the event website.**

## Schedule

Lecture	Date	Time	Topics	Lecturer
PhD School Lecture 1	08/02/2021	14:00-18:00	- Optimization and computational complexity - Vehicle routing problems - PhD thesis: what you should know	Maria Grazia Speranza
PhD School Lecture 2	09/02/2021	09:00-13:00	- The long road to practical decomposition methods	Antonio Frangioni
PhD School Lecture 3	09/02/2021	14:00-18:00	- A gentle introduction to approximation algorithms	Michele Monaci
PhD School Lecture 4	10/02/2021	09:00-11:00	- Derivative-free methods for black-box optimization problems	Stefano Lucidi
PhD School Lecture 5	10/02/2021	11:00-13:00	- Optimization Models and Classification	Manlio Gaudioso
Workshop Lecture 1	10/02/2021	14:00-15:00	- Integrated methods for prescriptive analytics	Alberto Ceselli
Workshop Lecture 2	12/02/2021	12:00-13:00	- New integer and Bilevel Formulations for the k-Vertex Cut Problem	Ivana Ljubic
